Glass Lens

### 3" Down Light - White

- ▶ #04-112WWW
- ▶ Plastic Lens-#04-118W
- ▶ Screw mount retention
- ▶ Warm White Color Temperature -3200K

Please note that in the industry, when it comes to glass lens recessed down lights, the builders used 2 size lights, a 3" and a 4" light. You may see them referred to as different sizes like 3.25" or 4.5" and other dimensions, but they are all basically the same and will fit most applications across the different manufactures. Please note that not all glass replacement lens are interchangeable with different suppliers and a purchase of a complete light may be required. All down lights should have a UL label indicating who manufactured the light.
